The Design

"Compass Rose" — an original origami model, Mackenzie's third original design. An experiment of the frog body: a classic frog base transformed by bulking out the frog's body and valley folding down around the center point to create the center piece — a hexagon with 6 points — with the 4 flaps shaped into pleated starburst arms radiating outward. The hexagon center with pleated arms is the signature feature — no other published design combines it in a single square with no cuts.

Reference model folded from white paper.

Timeline of Creation & Publication

Date	Event	Evidence
Oct 18, 2026	Original design created; hexagon center + 4 pleated arms; photographed and shared	Original photo on file
Oct 18, 2026	Design named "Compass Rose" (chosen over "Rose Star")	Chat record
Oct 18, 2026	Originality research completed — no matching or substantially identical published design found	Research notes on file
Oct 18, 2026	Published publicly: Facebook origami groups ("Origami", "ORIGAMI WORLD") and Instagram (@mackybruce97) as part of the "Three original designs. One collection." post, with creation dates and © notice	Screenshots on file
